17TH ANNUAL CHAROLAIS & ANGUS BULL SALE

Friday 12th August 2022 at 1pm
"Wakefield", Wollomombi, NSW

"Wakefield" is located approximately 55km
East of Armidale on the Waterfall Way.

- * 141km South West of Grafton.
- * 35km West of Ebor.

The Sale will also be Interfaced
via Elite Livestock Auctions

Visit the website for more information:

We are pleased to welcome you to the Seventeenth Annual Wakefield Sale.

What a year it has been! While cattle prices have continued to be very strong we have seen a large rise in our input costs across all areas. Fencing materials, fertiliser, shire rates, animal health and building materials have all increased dramatically with prices continuing upwards. We have experienced difficulty with managing the wet conditions, pasture improvement has been a problem and we had to postpone planting as it was impossible to put tractors into paddocks. Animal health has thrown in a new set of problems with increased internal parasite problems, particularly fluke in our area and the stock not doing as well with prolonged wet conditions.

All of this pales into insignificance compared to what happened on the North coast with two major flood events in a row and our hearts go out to everybody affected. The effects of these disasters are ongoing and the full extent of the problems have not been publicized properly. Just because the water has receded it does not mean it is over, there are whole communities displaced, without amenities and facing an uncertain future. Farm infrastructure has suffered badly with large amounts of fencing and buildings destroyed. The higher prices of materials coupled with short supply of contractors and inability to access the paddocks has created major headaches.

The government has provided some relief with flood grants but it may be not enough to keep some farms going. The ongoing wet conditions have meant many farms have been unable to plant their crops so have had the extra burden of having to buy hay in one of the wettest years on record. Fortunately there has been agistment available and many producers have taken the option of moving their cattle until pasture conditions recover. At the time of writing this there has been another flooding event on the Central coast with disaster areas being declared. It is incredible that only two and half years ago we were experiencing the worst drought in recorded history and now with La nina one of the wettest. The resilience being shown by farmers is beyond belief and a credit to the industry.

We have once again been spending a lot of 2022 catching up on repairs and maintenance to fences, yards and sheds after a fair bit of neglect due to drought feeding. We have been working recently on covering some of our stockyards to make management a little easier. With numerous AI and ET programs we have become a little tired of standing behind cows in the rain and particularly thunderstorms. It is fabulous to see a lot more work being done on farms with the increased returns for livestock. The flow on effect from increased livestock prices in the rural towns has been substantial and with the moderation of regulations around Covid business is beginning to return to normal.

It was a pleasure to attend and once again sponsor the Grafton weaner sale and have a chance to see an outstanding line up of young cattle. Congratulations to the vendors on the quality of the weaners and, even with some of "the bloom" taken off them with the persistent wet weather, we were very impressed with the quality of the cattle on display. It is tremendous to see producers being rewarded for the effort they are putting into their breeding programs.

For the second year in a row it has been one of those rare events when nearly all of the Eastern states from the top of Queensland to Victoria are experiencing average to above average rainfall and the outlook leading into the spring is positive, this coupled with continuing high cattle prices and a still recovering National herd has reassured producers of a strong future in the beef industry. Demand for breeding females is still strong and whilst there will undoubtedly be a correction at some stage the market is being underpinned by operators who have still yet to restock after the 2019 drought. It is certainly a time for producers to boost cash reserves and catch up on maintenance. With interest rates remaining historically low and increased competition from corporate investors there has been a quite dramatic lift in land prices which has increased landowner's equity but made expansion a more difficult proposition. It is hard to imagine land prices to continue rising at the levels they have but over time that has been the case and with limited areas suitable for grazing and encroaching urban sprawl it will probably continue. Interestingly overseas investors seem to think that Australian land is still cheap in comparison to world prices.

On the family front Chris and Lucy continue to improve their farm at Dorrigo and are busy running both farm stays. The Good Life Beef business is expanding and they are continuing to lease 1200 acres closer to Armidale to accommodate their rapidly increasing breeding herd. Chris continues to work at Grazag and help Lucy on the weekends and after hours (as well as bringing building and animal health supplies home for the in-laws) – he is a busy boy! Our youngest daughter Claire has finally arrived home from the UK, with a lot of experience gained, and settled back into life in Australia. She is currently doing a few days a week at a local Armidale practice, some local vet work and renovating a house on our Chandler block with a view to opening her own practice in the future. It has been nice to have a vet on hand to do our preg testing – we are very happy to push the cattle up and not have to pull a glove on! We are very grateful to our family for everything they do for us and proud that they see a future in agriculture.

WELCOME

Over the last 12 months, once again, there have been many outstanding results in feedlots, sales, abattoirs and stud bull auctions from stock sired by Wakefield bulls. The overwhelming comments have been how well the bulls are performing under tough conditions, their longevity, and the market suitability of their progeny. We would like to thank our bull buyers for their loyalty and it is reassuring to see their dedication being repaid with the strength of the cattle market.

This year's sale will include ten registered Charolais heifers pulled from the heart of our herd, including our most successful female lines. There are quite a few show potential heifers with a history of Royal show broad ribbon winners in their pedigrees. We are very proud of the quality of these heifers and are certain they will go on to become super matrons.

The Wakefield bull breeding program is tailored to produce calves which will fit the specifications of a wide range of markets and remember we are a commercial operation as well and have a good understanding of what is required. We appreciate feedback from our clients on how our bulls are performing as it helps us to make more informed breeding decisions. Once again, 2022 will see a large percentage of our purebred calves born by AI and embryo transfer with the emphasis on breeding tough cattle that are at the top of the breed for dollars earned.

The bulls this year have been prepared on planted pasture grass paddocks with very limited or no grain assistance. They will present in a forward but not fat condition and we are very happy with the way they are shaping up. As always we will not compromise by heavily grain feeding our bulls. We are not one of the breeders whose bulls are the best you will ever see them on sale day! We think this is critical to the longevity of the bull and his ability to hold condition under tougher conditions. Quite a few of our bulls are jumped directly off the truck straight into client's cow herds!

We look forward to seeing you on Friday the 12th of August at our "all weather" sale complex. Complimentary lunch will be available prior to the sale, which commences at 1pm. Remember if you would like any more information we are only a phone call away and on the day, pack a jumper and bring your catalogue!

The Frizell Family

STUD HISTORY

This year we celebrate 162 years of continuous cattle breeding as Wakefield has been held in the same family since 1860.

Wakefield began breeding Charolais in 1970 when the breed was first introduced into Australia and used most of the early French bulls in grading up programs until currently a herd of 600 Charolais, Charolais composite and Angus females are maintained. Through the years there have been selected introductions of stud Charolais females, purchase of embryos, regular artificial insemination and embryo transfer programs.

We have been breeding Angus for our composite program for many years and for the last 16 years have been building our registered Angus herd. In combination with upgrading existing cows to APR status, large scale artificial insemination/ embryo transfer programs and introduction of industry leading embryos the Angus herd is growing rapidly.

Our emphasis is to produce bulls to increase profit in our client's herds and the calves born over the next few years will be sired by a smaller number of select sires. We think that Canadian, French and Australian Charolais sires provide the balance of growth and carcass characteristics we require. Angus sires are being sourced from the US and Australia.

Wakefield was amongst the pioneers in the use of Charolais Composite bulls and it is pleasing to see Charolais being recognised as the "breed of choice" in crossbreeding programs. We have decided to concentrate more on our purebred lines as they seem to provide more uniformity in their progeny and keep breeding programs simpler for our clients. A lot of herds have used composite bulls as a stepping stone into the Charolais breed and have quickly realised the financial benefits of crossbreeding.

Our aim is to breed moderate birth weight Charolais while maintaining good growth and carcass characteristics. Wakefield is a Group Breedplan member so EBVs are available on all purebred bulls and our herd is based around selecting for commercially important traits, such as yield which will become increasingly important under new payment systems. We are bull breeders not bull feeders. Structural correctness is very important to us and we like to have feedback from our clients to make sure the bulls are performing well under all conditions.

We are proud of our sale bulls and can recommend them to you as herd improvers. They can be purchased in the knowledge that they will perform well under commercial conditions and are fully guaranteed.

SALE INFORMATION

REFRESHMENTS - Complimentary lunch and refreshments will be provided by Wakefield.

INSPECTION - Inspection can be made prior to sale day by appointment with the agents or the vendors. Bulls will be available for inspection on sale day from 10am.

COVID-19 - Please be responsible and respectful of others and their health and safety, and do not attend if you are unwell.

Online bidding with Elite Livestock Auctions and over the phone bidding are available and private inspections are welcomed and encouraged at any time prior to the sale.

TREATMENT SCHEDULE BULLS

- 20/6/2022

Bayer Exifluke 240 oral
Pour on Cydectin Platinum
Lepto vaccination
Pestivirus vaccination
Vibriosis vaccination
Three-day sickness vaccination

- 25/7/2022

Lepto booster (booster required yearly)
Pestivirus booster (booster required yearly)
Three-day sickness booster (booster required yearly)
Vibriosis booster (booster required yearly)
8 in 1 booster (booster required yearly)
Multimin injection

TREATMENT SCHEDULE HEIFERS

- 21/6/2022

Bayer Exifluke 240 oral
Cydectin Long Acting injection
Lepto vaccination
Pestivirus vaccination
Bovilus MHR vaccination

- 26/7/2022

Lepto booster (booster required yearly)
Pestivirus booster (booster required yearly)
8 in 1 booster (booster required yearly)
Multimin injection

QUALITY CONTROL

Pestivirus tested negative (hair sample)
Semen tested
Johnes Status – JBAS 7
EU Accredited herd
Angus bulls AM, NH, CA and DD status tested and Sire verified.

STUD TRANSFERS - All registered animals are eligible for transfer. For transfer of animals purchasers must be members of the relevant breed society.

GUARANTEE - In the unlikely event of infertility, provided it is not caused by injury, stress or disease contracted post sale, we will endeavour to supply a satisfactory replacement if available or issue a credit to equal the purchase price minus the salvage value to be used at future Wakefield sales. The purchaser will provide a veterinarian's certificate within six months of the purchase date.

TRANSPORT - Carriers will be attendance at the sale. We take a keen interest in arranging the most favourable transport for your purchases. This year we are offering free freight from Wakefield to Grafton, Casino, Walcha, Armidale, Kempsey and Lismore saleyards, with the carrier of our choice. Delivery arrangements are to be made in writing on the buyers instruction form provided in the back of this catalogue.

REBATE - 2% rebate available to outside agents accompanying potential purchasers and settling for purchases within 7 days of receipt of invoice.

NOTICE TO BUYERS - All lots will be sold subject to the usual terms and conditions governing auction sales. Phone service is available at sale complex. Please contact the vendors or your preferred agent on sale day to arrange phone hook-up. This year's sale is also interfaced with Elite Livestock Auctions.

CARING FOR YOUR BULL

This year's sale bulls range from 15 - 24 months of age and will need to be managed accordingly.

There are many advantages in buying younger bulls. You see the bull closer to the weights you are likely to be marketing your cattle at. You will get an extra year of use from your bull and most importantly you are getting the 'pick of the crop'. In our experience the best bulls will be good at all stages of growth and not only when they are mature. You can be confident that a young bull with eye appeal will only get better!

But younger bulls are still growing quickly and need enough feed to maintain their growth pattern while settling your cows. Younger bulls can be introduced into paddocks with older bulls but remember he will be on the bottom of the pecking order and will need room to avoid the others. His nutritional requirements will be greater than a mature bull so make sure he has adequate feed.

Our bulls are used to running in a mob and will arrive in a strange environment at the purchaser's property. Unload him and if possible make sure he has a steer or cow as a companion straight away. Our cattle are mustered on motorbikes and are handled gently but firmly. They may need to be introduced to horses. The bulls have been trained to respect electric fencing.

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in
Australia and "Happy Bidding"

-  1 Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device
-  2 Click on the "Sign Up" page / link
-  3 Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer.)
-  4 Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
-  5 Click "Register"
-  6 You will then be notified by email that an account has been created

-  7 Once an account has been created you are all "Set to Bid"
-  8 Each auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website
-  9 Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"
-  10 The sale agents will then approve your application to bid and on the sale catalogue you will see "✓ Bid Request Approved"
-  11 On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding.
(There is no need for software download)
-  12 At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

Charolais BREEDPLAN EBV Explanations

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These estimates are called Estimated Breeding Values (EBVs).

In the calculation of EBVs, the performance of individual animals within a contemporary group is directly compared to the average of other animals in that group. A contemporary group consists of animals of the same sex and age class within a herd, run under the same management conditions and treated equally. Indirect comparisons are made between animals reared in different contemporary groups, through the use of pedigree links between the groups.

EBVs are expressed in the units of measurement for each particular trait. They are shown as +ive or -ive differences between an individual animal's genetics and the genetic base to which the animal is compared. For example, a bull with an EBV of +50 kg for 600-Day Weight is estimated to have genetic merit 50 kg above a value of 0 kg. Since the breed base is set to an historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic progress within the breed.

The absolute value of any EBV is not critical, but rather the differences in EBVs between animals. Particular animals should be viewed as being "above or below breed average" for a particular trait.

Whilst EBVs provide the best basis for the comparison of the genetic merit of animals reared in different environments and management conditions, they can only be used to compare animals analysed within the same analysis. Consequently, Charolais BREEDPLAN EBVs cannot be validly compared with EBVs for any other breed.

Although EBVs provide an estimate of an animal's genetic merit for a range of production traits, they do not provide information for all of the traits that must be considered during selection of functional animals. In all situations, EBVs should be used in conjunction with visual assessment for other traits of importance (such as structural soundness, temperament, fertility etc). A recommended practice is to firstly select breeding stock based on EBVs and to then select from this group to ensure that the final selections are otherwise acceptable.

EBVs are published for a range of traits covering fertility, calving ease, milking ability, growth, carcass merit and docility. When using EBVs to assist in selection decisions it is important to achieve a balance between the different groups of traits and to place emphasis on those traits that are important to the particular herd, markets and environment. One of the advantages of having a comprehensive range of EBVs is that it is possible to avoid extremes in particular traits and select for animals with balanced overall performance.

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

- **CE % Dir = Direct Calving Ease** - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

- **CE % Daughters = Daughters' Calving Ease** - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination and hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Carcass Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) indicates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

Rump Fat EBV (mm) is an indicator of the genetic differences between animals in fat depth at the p8 rump site in a standard 300kg steer carcass. Sires with low, or negative, fat EBV are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Rib Fat EBV (mm) is an indicator of the genetic differences between animals in fat depth at the 12/13th rib site in a standard 300kg steer carcass. More positive or more negative Rib Fat EBVs may be more favourable, depending on your breeding goals relating to the finishing ability of your animals.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300kg steer carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg steer carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices

Index values are reported as EBVs, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values. Note that different types of animals can give similar profit values, so consideration should be given to both the index and the component EBVs when selecting animals for a particular production system. More information is available on selecting animals using a selection index.

The Index values are derived using BreedObject technology. More information is available from the BreedObject web site.

Charolais selection indices are calculated for two standard market specifications – Domestic Terminal and Northern Maternal - and are designed to optimise profit outcomes from commercial production systems. More information is available on Charolais Selection Indices.

Domestic Terminal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for a typical commercial herd where Charolais bulls are joined with a British breed cow base (e.g. Angus)

targeting the domestic trade. This index assumes all progeny will be marketed with steers finished in the feedlot for 90 days and weighing 450 kg (250 kg HSCW and 7 mm P8 fat depth) when marketed at 12 months. Heifers will be in the feedlot for 75 days and weigh 430 kg (230 kg HSCW and 9 mm P8 fat depth) at 12 months. In response to industry feedback, positive emphasis has been placed on finishing ability.

Northern Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for a typical commercial herd where Charolais bulls are joined with Bos indicus cows in Northern Australia targeting the grass fed Jap Ox market. Selected heifers are retained for breeding and so maternal traits are of importance. Steers target 650 kg live weight (360 kg HSCW and 12 mm P8 fat depth) and heifers 630 kg (340 kg HSCW and 14 mm P8 fat depth), at 26 months of age. In response to industry feedback; positive emphasis has been placed on finishing ability.

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

- **less than 50%:** Low accuracy. EBVs are preliminary and could change substantially as more performance information becomes available.
- **50-74%:** Medium accuracy. Usually based on the animal's own records and pedigree.
- **75-90%:** Medium-high accuracy. Some progeny information included. EBVs may change with addition of more progeny data.
- **more than 90%:** High accuracy estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

COMMENTS: Masquerade has been a very successful sire in the Wakefield herd for the last couple of years. He has sons at this sale that are true to type Charolais, full of power with tremendous length of body and great top lines. He is a polled bull by Canadian sire CML Encore out of our original Ace cow A862E that has produced many outstanding animals in the Wakefield herd. He was the sire of the top priced bull, Wakefield Patriot selling to a repeat buyer from the Bangalow area in 2020.

COMMENTS: Noble N511 has been used extensively at Wakefield on heifers. He has produced moderate animals that have early maturity with plenty of muscle and natural finishing ability. The females take after his dam Abracadabra 11 a LT Bluegrass female that milks well, is fertile, slick coated, great temperament and a great doing cow.

COMMENTS: Lorax is a homozygous polled, red factor by by LT Ledger and a real favourite here at Wakefield. He is a tremendously quiet boy that is giving us thick, meaty bulls and feminine wedge shaped females. His full flush sister Wakefield Friesia L987E is a very stylish cow that has been in our show team, she milks well and is very fertile and was the dam of the top priced bull Wakefield Right On Time at last years sale .

COMMENTS: President is by Canadian sire CML Distinction out of our Charolais National Champion exhibit in 2019 and Interbreed Champion Female at the Ekka in 2019 Wakefield 38 L993E. He is a soft skinned, free moving very correct bull that has a smooth muscle pattern but maintains plenty of punch in his progeny. The females have correct phenotypes and are very stylish with tremendous eye appeal.

COMMENTS: Wakefield Emperor N650 we used in our herd over heifers and cows. The heifers calved very well and the bull calves at weaning were the heaviest in the draft. He is out of a cow that we purchased as an embryo from Millah Murrah and has had a major influence in our herd. She was a donor dam and is still in our herd today.

COMMENTS: Strike Me Lucky starts our sale this year. He is a free moving, polled, red factor bull with plenty of muscle. He is a long bodied bull that has tremendous spring of rib. He is an ET calf out of our Autumn L974 line by an XR8 son. We would recommend that he be used on mature females. Plenty of power in this young bull and the comment has been he looks a lot like Donald Trump. We would expect this bull to produce for all beef operations.

COMMENTS: Read'em'And Weep is an outstanding bull that catches your eye and stands on good bone. He is a polled bull with a solid top line and is phenotypically correct. He has smooth muscle pattern and a soft skin that is a trait of his sire Venturon Maximum Impact. This bull is absolutely one of the best! His dam E445E is an absolute favourite in our herd and was flushed to give us the sons in the sale this year. Her natural calf sells in the heifer line up. E445 is the dam of the winner of the Interbreed Champion female at the EKKA in 2019 and National Supreme Exhibit in Wakefield Amaze 38. We have used this bull in our herd. Don't miss out on this herd improver.

COMMENTS: This outstanding polled Maximum Impact son catches your eye every time you go into the paddock. He has good conformation, standing on good feet and legs with tremendous length, muscle and eye appeal. Raise The Bar has plenty of punch on his dam's side from French sire Ijoufflu. His mother Amaze 9 is the full flush sister to the dam of the Supreme Charolais exhibit at the Charolais National 2019. We rate Amaze 10 as the best cow we have ever bred and her sister is a great cow we rate also! R328 has above average growth, a smooth shoulder set and great softness to a meaty bull. Well worth your consideration!

COMMENTS: What's not to like about this young fellow, make some noise for Swashbuckler! This is one of the first Silverstream Manhattan son's to sell in Australia and what a beauty! This slick coated, polled bull has tremendous growth and power, a smooth muscle pattern with plenty of punch. He has plenty of capacity and carries himself very well. He has caught our eye since he was born and was the heaviest calf weaned. His dam is extremely fertile and milks very well. This bull has stud sire written all over him. Would suit from vealer operations to jap ox. Don't miss out on an outstanding young bull.

COMMENTS: What's not to like about this bull. This is the half brother to last years top price bull selling for \$22,000. Starmaker is a very correct, red factor polled bull that is bred in the purple. He is free moving with a long body, good neck extension with a good shoulder set and his carcass data and growth figures are well worth taking notice of. This bull is top shelf genetics, his mother is the full flush sister to Wakefield Lorax that has many son's selling today. Friesia is a show cow in her own right! Don't miss out on this one, he'll make you very happy!

COMMENTS: Redskin is another son by Canadian Champion Elder's Blackjack that exhibits tremendous growth and thickness. He is a polled, red factor bull that is a long, free-moving, soft and true-to-type Charolais. His dam Camelot 7 is a fertile, good milking cow that always produces good progeny. He has positive fats, a good EMA and gestation length. Don't overlook this bull.

COMMENTS: Regale is polled and a very thick bull that catches the eye. He is out of a first calving heifer that is the daughter of Canadian Champion of the World winner Elder's Blackjack and her dam is the extra special Amaze 10. Absolutely is this bull worth looking at...he has positive calving ease and above average growth, positive fats and his calving ease figures and birth weight would make him suitable for crossing into british bred herds to produce outstanding progeny.

COMMENTS: Regent is another scurred, son of Wakefield Noble N511. The Noble progeny are true to Charolais type with good toplines, plenty of muscle and powerful heads. Did I mention the calving on the Noble sons, it's amazing. Will add finishing ability with good growth and a positive set of carcass data. This young bull has good calving ease and ticks all the boxes. Drop him in your paddock today and see the difference a Charolais can make on your herd.

COMMENTS: Scotch On The Rocks is a red factor, homozygous polled bull that we think is an outstanding yearling bull and potential stud sire. He is bred in the purple out of a wonderful line of females that have performed in the paddock and the showing. His grand dam is the show winning Ace 6 K800 and his dam is sired by Canadian 2020 winner of Charolais Champion of the World Elder's Blackjack. He is a soft skinned, classy young bull that has curve bending figures - born easily then grow like mushrooms. Sit back and enjoy Scotch On The Rocks.

COMMENTS: An eye catching son of EF Primequarter out of a SAV Thunderbird female to start the Angus sale today. He has a smooth muscle pattern, amazing growth and an easy fleshing ability on a big frame. He has tremendous length of body with plenty of punch. Wakefield Primequarter's dam K667 is a fertile cow that never misses a beat. She is a roomy cow with good depth of flank, a well made udder and a great temperament. Don't overlook this outstanding fellow, he has been used in the Wakefield herd and has a wonderful disposition, well worth your consideration. Top 10% for 200 day growth and rib fat and top 20% for 400 day growth.

COMMENTS: Another EF Primequarter son that has a good neck extension and smooth shoulder set. His dam Wakefield Abigail J504 is a Mohnen Dynamite daughter that is still in our herd producing top progeny. R460 is an easy fleshing bull with good body length and a slick coat. His calves should be born easily and grow well. Top 15% for calving ease on daughters

COMMENTS: R451 is a Baldrige Command son out of a big framed D78 daughter. We are very happy with his do ability and staying power after backing up an ai program in our herd late last year. He has a presence and style about him with good length of body. R451 was born early and small at 35kg and we have used him on our heifers for this reason. Top 5% for 200 and 400 day growth and Top 4% for RBY, Top 10 % for 600 day growth and ABLFC Index and EMA.

COMMENTS: Wakefield 38 Special R491 has a smooth shoulder set, with good neck extension for ease of calving. A complete bull with good muscularity, a natural finishing ability and good length of body. The calving ease direct and birth weight figures suggest that this bull would be suitable for use on heifers. We have used this outstanding bull in our herd as he is phenotypically correct, moves very well, has terrific growth, muscularity and doing ability and has a good temperament. Top 10% for 200 day growth and both dollar indexes, Top 15% for 400 day growth, top 25% for calving ease direct, low birth weight and rib fat.

Genetic Conditions: AMFU,CAFU,DDFU,NHFU

COMMENTS: A very good bull with plenty of meat by an American AI sire in Baldridge 38 Special. This bull has a good finishing ability on a good frame. He is free moving and has very good weight for age. His dam is a A241 cow in the Wakefield herd that has been producing exceptional progeny with plenty of style and thickness. He has a good temperament, depth of body and plenty of muscle definition. Baldridge 38 Special was used in the Wakefield herd on heifers and cows for his calving to growth spread, a real all rounder in our eyes. We have Aled to Baldridge 38 Special for the last few years and know that the progeny will be true to type Angus. R478's calving ease direct, gestation length and birth weight figures suggest he would be suitable for use on heifers. Top 15% for both dollar indexes and top 20% for gestation length, calving ease direct and 400 day growth, top 25% for 200 day growth and scrotal.

Genetic Conditions: AMFU,CAFU,DDFU,NHFU

COMMENTS: A Keystone son that was born easily and early and then grew very well. He is out of a Mohnen Dynamite cow M328 that has never mised a calving and always raises a good calf. R499 has a great gestation length and birth weight and the figures suggest that he would be suitable for heifers. Top 5% for gestation length, top 15% for rib fat and carcase weight and top 20% for low birth weight.

COMMENTS: This is another son of homebred Emperor N650. The N650 calves are docile and correct while maintaining natural finishing ability and good growth. When we talk about beef, this bull is producing plenty of long bodied, meaty bulls with good finishing ability. Females are breeding well in our herd and the bulls have wonderful phenotypes with good temperaments. Top 15% for net feed efficiency

COMMENTS: Baldridge Command has produced some outstanding progeny for us at Wakefield. The bulls have grown very well, have great body length and good temperaments. The calves were born easily and then grow quickly. R482 has good calving figures and his progeny should have plenty of meat in them to suit many cattle operations. Top 10% for RBY, top 15% for AB Index and calving ease direct and top 20% for the other dollar index. Top 25% for EMA.

COMMENTS: A potential show heifer and the last of the heifers to be offered today is Autumn 44 another Silverstream Manhattan daughter that has a lovely nature. She is out of another cow line that we value here at Wakefield. The Autumn line has produced some amazing show females and has been very successful for other studs across Australia.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

.....

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following ids.....

.....
from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

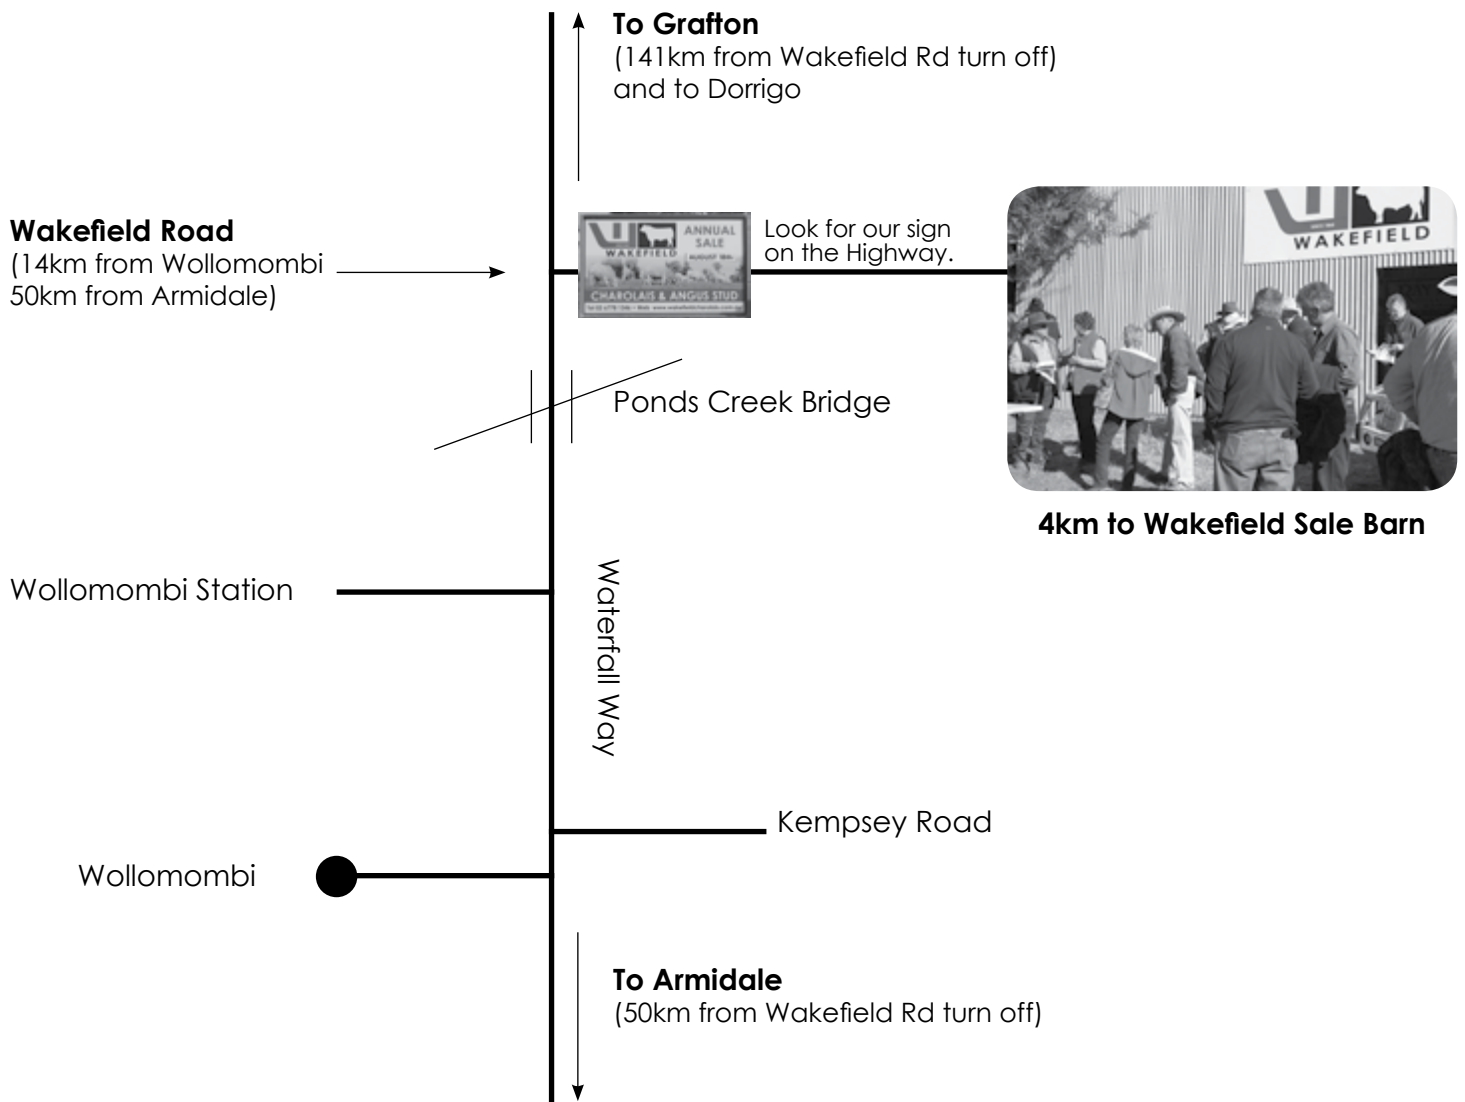

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au
